EXCELLENCE IN WOOD SINCE 1968

Bespoke Joinery, Built Around Your Requirements

Established in 1968, Cubby Joinery is an experienced carpentry and joinery manufacturer specialising in high quality, made to measure products for residential, commercial and heritage projects.

Based in Carlisle, Cumbria, our 20,000 square foot workshop brings together experienced craftsmen, modern manufacturing technology and traditional joinery skills. Every project is developed around the requirements of the client, from individually designed doors and windows to staircases, kitchens, architectural joinery and more complex bespoke pieces.

As part of the wider Cubby Group, Cubby Joinery also has access to a broader range of construction and specialist capabilities. This provides additional flexibility when joinery forms part of a larger construction or refurbishment project.

Cubby Joinery is a member of The Joinery Network, providing access to recognised new build accreditations and established industry standards. Fell & Frame forms part of Cubby Joinery's wider offering, specialising in the design and manufacture of high quality timber windows and doors for new build developments. This combination brings together bespoke joinery expertise with dedicated timber window and door manufacturing capability, providing clients with a broader range of solutions through one established joinery business.

With more than 50 years of experience, Cubby Joinery combines established craftsmanship with modern manufacturing methods to produce joinery that is designed specifically for the project. Whether a single bespoke item or a larger commercial requirement, our focus remains on understanding the brief and delivering a finished product that meets the client's requirements.

BESPOKE KITCHENS

We design and manufacture bespoke handmade kitchens that combine traditional craftsmanship with modern design and precision manufacturing.

Each kitchen is built to order, delivering a fully tailored solution that reflects your space, lifestyle, and design vision.

Our bespoke kitchens are suitable for a wide range of projects, including residential homes, barn conversions, heritage properties, contemporary interiors, and commercial environments such as restaurants, hotels, and hospitality venues.

Traditional in-frame kitchens

Shaker-style kitchens

Contemporary handleless kitchens

Painted timber kitchens

Feature kitchen islands and statement pieces

your design perfectly crafted.

We use a wide selection of high-quality, sustainably sourced materials, ensuring durability and long-term performance. Material options include; hardwood cabinetry (including ash and other premium timbers), softwood options for painted finishes. Composite materials, glass, stone and metal features for custom worktops and integrated elements.

Designed using advanced CAD software for accuracy, our made-to-measure kitchen cabinetry benefits from a dedicated in-house finishing process, ensuring complete control over quality and consistency.

Finishing options include painted or lmainated finishes in a wide range of colours, natural timber stains and oils, lacquered and varnished surfaces or spray-applied finishes.

DOORS & WINDOWS

We manufacture a complete range of custom timber doors, combining strength, security, and striking visual appeal. Our collection includes both traditional and contemporary front entrance doors, as well as bespoke hardwood designs crafted to your exact specifications.

Combining timeless craftsmanship with modern performance.

For heritage properties, we also produce period reproduction doors, carefully matched to suit listed and historic buildings. Each door is available in a wide selection of timber species, finishes, and our ironmongery options allow for a truly tailored result. Unlike off-the-shelf alternatives, every door we create is individually crafted to meet precise dimensions, style preferences, and performance requirements.

FELL & FRAME

Fell & Frame specialises in the design and manufacture of high quality timber windows and doors, combining traditional joinery craftsmanship with modern precision manufacturing.

Made in Cumbria using responsibly sourced timber, each product is manufactured to the requirements of the project, with a choice of timber species, glazing, finishes, ironmongery and detailing.

From individual replacement windows and bespoke period designs to larger residential developments, extensions and new build projects, Fell & Frame provides timber solutions designed to deliver the right balance of appearance, performance and durability.

BESPOKE STAIRCASES

Each staircase is engineered to meet the spatial and structural requirements of your project for both residential or commercial use.

We manufacture staircases using a wide range of high-quality, sustainably sourced timbers, alongside complementary materials to suit different styles. Our options include; hardwood such as oak, ash and other premium species, as well as softwood ideal for painted finishes. Modern design features, such as glass balustrades, panels and steel elements are used to create modern architectural designs.

This flexibility allows each staircase to achieve the desired balance of visual style, strength and longevity.

Designed using advanced CAD modelling for exceptional precision, every detail is carefully considered before manufacture. We utilise CNC machining to achieve outstanding consistency and accuracy, resulting in a high-quality finish throughout.

Built to comply with current building regulations, our staircases are suitable for both striking feature designs and practical, functional installations.

Available configurations include:

- Straight flight staircases
- Open tread and feature staircases
- Winder and quarter-turn staircases
- Cut string and closed string designs
- Feature staircases incorporating glass and steel

Structurally Sound.
Visually Distinctive.

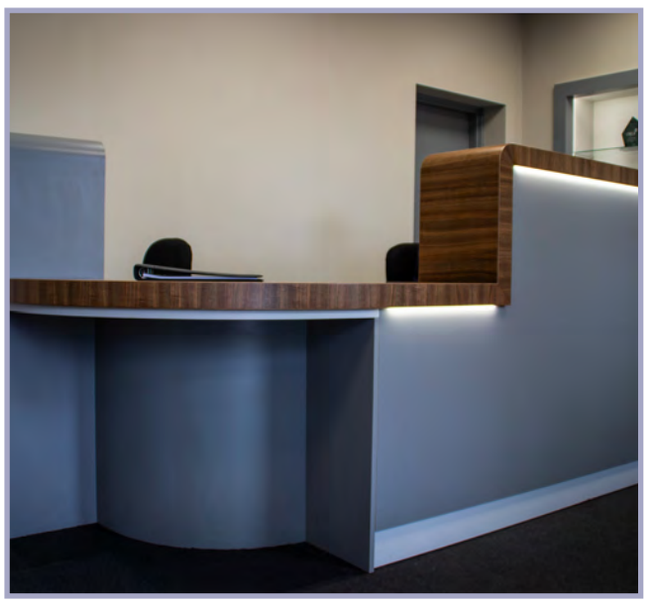

BESPOKE FURNITURE

Our bespoke furniture is designed to suit a wide variety of interiors, applications, and design styles, from classic to contemporary. Product options include;

- **Fitted wardrobes and bedroom storage**
- **Freestanding furniture and statement pieces**
- **Living room cabinetry and media units**
- **Bespoke shelving and storage solutions**
- **Custom-built furniture for unique spaces**

With a wide choice of materials, finishes and detailing, our made-to-measure furniture is designed using advanced CAD software for accuracy being manufacture.

Our expertise extends beyond residential interiors. We also create bespoke furniture for:

- **Home offices**
- **Libraries**
- **Commercial spaces**

Cubby Joinery has a dedicated spraybooth and spray painter.

We can match colours and finishes to complement your exisiting decor.

ARCHITECTURAL & STRUCTURAL

We provide architectural and structural joinery for projects ranging from residential developments to large-scale construction. Our team works closely with architects and builders to deliver timber elements that are both structurally robust and visually striking.

From beams, columns, and staircases to feature joinery within heritage or contemporary buildings, every component is crafted to meet exacting standards. By combining traditional joinery techniques with modern engineering, we ensure our architectural timber performs flawlessly while enhancing the overall aesthetic of your project.

HOSPITALITY & LEISURE

Cubby Joinery specialises in bespoke interiors for retail and hospitality spaces, creating furniture, display units, and fittings that reflect the brand identity while providing practical functionality. Every element from shop counters and shelving units to bar fronts and reception desks are tailored to suit the space, style, and workflow.

Using premium materials and precision finishes, our joinery elevates commercial interiors, creating an experience that is both engaging for customers and durable for daily use.

RETAIL

Bespoke shop, commercial and hospitality fittings bring together luxury, design coherence and character helping your business stand out and leaving a lasting impression that keeps customers coming back.

With a long-standing reputation, Cubby Joinery has collaborated with leading architects and interior designers to deliver high-quality retail and hospitality spaces across the Lake District, Cumbria, North Yorkshire and the Scottish Borders. Our portfolio includes projects for Center Parcs luxury boutique hotels, restaurants, bars and other major retail outlets.

Tailored Displays and Workstations

Shelving and Storage Solutions

Counters and POS Units

Store Design & Fit-Out

Planters

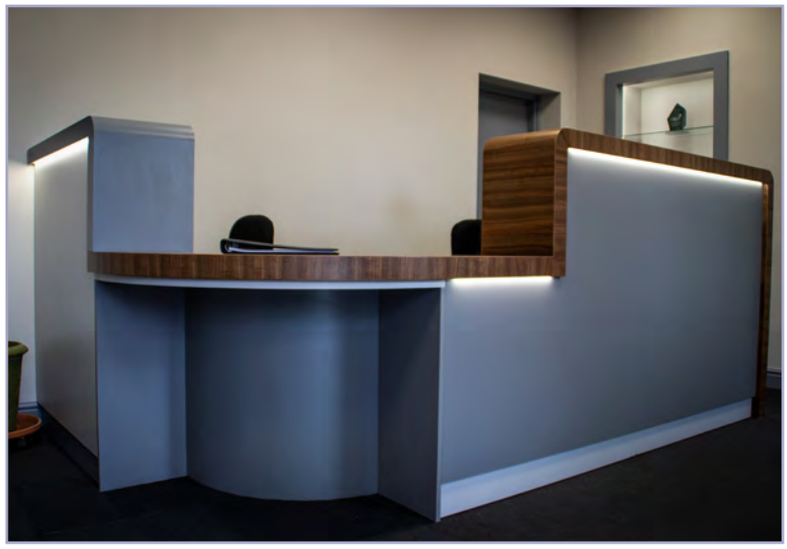

Seating

Offering more than manufacturing alone, Cubby Joinery provides a complete turnkey service from design through to construction and installation ensuring a seamless, cost-effective interior solution delivered to the highest standard.

FIRE DOORS

Our commercial fire doors are purpose-built to deliver reliable protection without compromising on quality or finish. Manufactured to meet stringent fire safety standards, each door is rigorously tested to provide certified fire resistance and help contain the spread of fire and smoke.

With precision manufacturing and full compliance with current regulations, our fire doors offer dependable performance, giving you confidence in both safety and specification for a wide range of commercial environments including;

- **Office spaces**
- **Hospitality and Leisure**
- **Retail**
- **Schools**
- **Healthcare facilities**

Cubby Joinery is certified to manufacture both FD30 and FD60 timber fire doors for internal and external applications, providing independently verified fire performance and quality assurance.

Through Cubby Construction, we can provide FIRAS-certified fire door installation, inspection and maintenance services.

CUBBY GROUP
